

Git Hub Proyectos

JAFH

Git Hub Projects

GitHub Projects es una herramienta de gestión de proyectos **integrada directamente en GitHub** que te permite organizar y dar seguimiento a tu trabajo de manera visual.

Permite manejar:

- **Issues: (Incidencias o Tareas)** son el sistema de **seguimiento de bugs, features y tareas** en las plataformas de control de versiones. Son el corazón de la colaboración en proyectos de desarrollo.
- **Pull Requests: (PR)** es una funcionalidad fundamental de Git y GitHub que permite proponer cambios en un repositorio de código y solicitar que sean revisados e integrados (merged) en la rama principal.
- **Repositorios**
- **Milestones: (Hitos)** son una herramienta de organización en GitHub que te permite agrupar y trackear issues y pull requests alrededor de un objetivo específico o fecha de entrega.

Permite Vistas múltiples

- **Tablero Kanban**
- **Tabla** (como spreadsheet [hoja de cálculo])
- **Roadmap** (línea de tiempo)

Para Crear

Desde un Repositorio:

1. Ve a tu repositorio
2. Click en "Projects" → "New project"
3. Elige plantilla o crea personalizado

Desde tu Perfil:

1. GitHub.com → "Your projects"
 1. "New project"
 2. Conecta repositorios

jflorespampano

Welcome to projects
Built like a spreadsheet, project tables give you a live canvas to filter, sort, and group issues and pull requests. Tailor them to your needs with custom fields and saved views.

Crear milestone

Desde la web de GitHub:

1. Ve a tu repositorio
2. Click en "Issues" → "Milestones"
3. Click "New Milestone"
4. Llena la información:
 1. **Title:** Nombre del hito
 2. **Due date:** Fecha límite
 3. **Description:** Objetivos

Crear un pull request desde Git

1. Hacer fork(crear copia personal) clonando
`git clone https://github.com/usuario/repo.git`

2. Crear rama para feature
`git checkout -b feature/nueva-funcionalidad`

3. Hacer cambios y commits
`git add .`
`git commit -m "Agrega nueva funcionalidad"`

4. Subir rama
`git push origin feature/nueva-funcionalidad`

Crear un pull request desde Git Hub web

Desde GitHub Web:

1. Navegar a tu repositorio fork
2. Click en "Compare & pull request"
3. Llenar información del PR
4. Seleccionar reviewers
5. Click "Create pull request"
